

TETON VALLEY HOSPITAL

Operated by Teton Valley Health Care

120 East Howard Avenue, Driggs, Idaho 83422
208-354-2383 www.tetonvalleyhospital.com

Announcing the opening of our new Medical Imaging Suite. Teton Valley Hospital now offers digital mammography for our community in addition to the ability to instantly transmit clear images to facilities throughout the U.S. and the world.

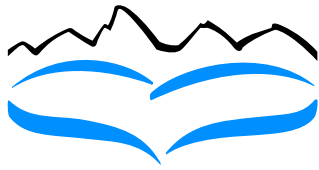

TETON VALLEY HOSPITAL

Operated by Teton Valley Health Care

Comfort, privacy and quality are all top priorities for our patients. A mammography technician recently visited our Suite and remarked that it was the most beautiful room she's seen. She travels all over the West checking mammography equipment! Because Teton Valley is such a beautiful place to live and visit, we believe our health care should reflect that beauty and environment of healing, too.

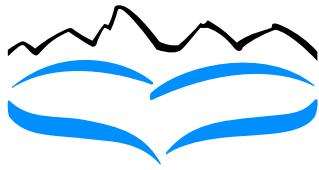

TETON VALLEY HOSPITAL

Operated by Teton Valley Health Care

We offer our community the latest digital technology and software support available. Our radiology technicians are certified through the American Registry of Radiologic Technologists (ARRT) and our mammographic imaging services are accredited through the American College of Radiology. All images are reviewed by a radiologist.

And check out the renovated Ultrasound exam room! With 3-D capability and the added comfort of a well-designed room, our patients can access the Ultrasound and Mammo directly from a dressing room or lounge area.

You are welcome to tour our new Medical Imaging Suite! Call 354-6301 to arrange your visit.

Teton Valley Health Care extends deep appreciation to all Teton County taxpayers and supporters of the Teton Valley Hospital Foundation for making these enhancements and patient services possible.
